

# Having a filling

You have a hole in your tooth which we need to fix.

You will sit in the chair so the dentist can look at your teeth.

The chair may move up or down so that the dentist can see your teeth.

The dentist will use a big, bright light.

The dentist will use gloves.

---

The dentist may use a mirror and probe.

---

The dentist will use tools to help fill your tooth.

---

You may have an injection to make your tooth numb and stop any pain.

---

Put your hand up if you need us to stop.

---

The tools the dentist will use to clean your tooth are very noisy.

We use a tool to suck water out of your mouth.

The dentist will fill your tooth and make it healthy again.
