

Teletriage

Remote clinical support to Wirral care homes

We are a multi-disciplinary team of nurses, healthcare professionals and general practitioners, providing support and advice to help reduce hospital admissions from care homes.

Jeff Harris
System Support Analyst

We use telephone consultations and Skype video calls to clinically assess residents who have become unwell and signpost them to an appropriate healthcare provider or resource.

Residents can be cared for and monitored by their care home. It's believed that caring for older people in an environment that is familiar to them with staff they know provides a far better care experience.

If you are concerned about one of your residents call us now on...
