

Healthy Wirral - Whole System Integration Update			
Meeting	Board of Directors		
Date	05/02/2020	Agenda item	10
Lead Director	Val McGee, Chief Operating Officer		
Author(s)	Various Contributors		
Action required (please tick the appropriate box)			
To Approve <input type="checkbox"/>		To Discuss <input type="checkbox"/>	To Assure <input checked="" type="checkbox"/>
Purpose			
<p>This paper describes a number of strategic activities across the health and social care system which the Wirral Community Health and Care NHS Foundation Trust (WCHC) is central in leading and supporting whilst ensuring an equality of partnership delivery and sustainability. At the same time, working with other community partners ensuring a strong out of hospital focus and clear leadership as work progresses in the development of Place Based Care, particularly the neighbourhood/Primary Care Network developments and ultimately an Integrated Provider System (IPS).</p>			
Executive Summary			
<p>This is the regular update paper for Public Board describing the work that the staff do to provide integrated care to the people of Wirral. Some are updates following on from previous papers and others describe service developments or redesign. Increasingly WCHC is seen as the organisations that connects providers to ensure the best outcome for individuals.</p>			
Risks and opportunities:			
<p>There are no specific risks identified, indeed the greater risk would be if we were not continuing to develop and enhance services across pathways and organisational boundaries. The paper describes the developmental work that we are doing jointly with NHSE/I improvement arm. The work that we are doing with North West Ambulance Service to enhance the current Acute Visiting Team service. The introduction of the commend meetings and the positive impact they are having on the system.</p>			
Quality/inclusion considerations:			
Quality Impact Assessment completed and attached <input type="checkbox"/> Equality Impact Assessment completed and attached <input type="checkbox"/> N/A			
Financial/resource implications:			
N/A			
Trust Strategic Objectives			
<i>Please select the top three Trust Strategic Objectives that this report relates to, from the drop down boxes below.</i>			
Our Populations - improving services through integration and better coordination	Our People - enhancing staff development	Our Performance - increase efficiency of all services	
Board of Directors is asked to consider the following action			
<p>The paper is to assure the Board of Directors of the commitment the Trust has to integration across a number of work streams and with key partners across the health and care system and the commitment to developing and enhancing out of hospital care.</p>

Healthy Wirral - Whole System Integration Update February 2020

Healthy Wirral - Neighbourhood development

1. The Target Operating Model development project has made significant progress since the last report. The project is led by David Hammond, Associate Director for Partnerships & Strategic Development. It is part of the Developing Integrated Services work stream within the Healthy Wirral Neighbourhood Programme Board, chaired by Karen Howell, Chief Executive.
2. Workshops in November and December 2019 brought together a wide range of people working across the health and care system supporting people with frailty.
3. In late November 2019, practices and wider services working in the Wallasey Primary Care Networks (PCNs) met to discuss more effective ways of supporting people with frailty. WCHC supported the Wallasey PCNs in jointly planning and delivering this event, with colleagues from WUTH and Age UK. Approximately 60 people attended, filling the largest available training space at Albert Lodge.
4. The output from this session informed a second workshop in early December, facilitated by the Advancing Quality Alliance (AQuA) at Mariss House. Again, 60-70 people working across the Wirral system in services for people with severe frailty came together to inform planning better services.
5. As previously reported, project work to review and improve services for people with severe frailty are the first phase of work to develop a system-wide Target Operating Model.
6. The December workshop validated approximately 20 high level service maps of those services and identified issues and opportunities to improve Wirral's approach to frailty, including identification, assessment, care planning as well as provision of both proactive and reactive services.
7. Concurrently, the project is also engaging with service users and their families and carers to understand what matters most to them, to inform recommendations for service development and redesign.
8. At a second system workshop on planned for the 9 March 2020, with a similarly numerous and wide range of professionals and service user representatives will review proposals resulting from engagement with professionals and our communities, national expectations and good practice from elsewhere. This will lead to recommendations for the Healthy Wirral Programme, to be developed during March 2020.
9. National expectations regarding some of this work will be set and communicated through the Primary Care Network service specifications for GPs and the NHS standard contract for NHS trusts. Based on the draft specifications, to which WCHC has responded, these are likely to include increased and more structured support for care homes and greater focus on multidisciplinary working and proactive care coordination between primary and community services.
10. The Target Operating Model project will take account of these, which are also likely to galvanise PCN-level planning for their delivery.

11. This planning will be supported by the relationship development and local improvement initiatives enabled by a series of PCN-specific workshops. Two workshops are planned for February and March 2020 with the Meols & Moreton PCN and West Wirral PCN respectively. As with the South Wirral and Brighter Birkenhead sessions, held in 2019, these will enable smaller PCN groups to take forward initiatives for better working between primary and community staff in those areas.

Integrated Health and Social Care

12. Since the last report, WCHC has continued to strengthen its links regionally in respect of Adult Social Care, which has provided an opportunity to both influence and shape regional and national agendas. As an integrated provider the benefits have been two fold, both in ensuring our own Adult Social Care services remain fully up to date with key developments and promoting a strong collaborative approach with the NHS.
13. WCHC has been involved in several key areas of work notably the Development of a North West Strategic Workforce Framework.
14. Incorporating the views of stakeholders across twenty three Local Authorities and three STPs, WCHC has been a key member of the steering group overseeing the development of a North West Workforce Framework for Adult Social Care. Commissioned by North West ADASS (NWADSS) and the Local Government Association (LGA), this piece of work has been led by the Institute of Public Care (IPC) and aims to collate and develop a range of strategic approaches and initiatives to meet a number of key workforce challenges.
15. Overarching areas will include attraction, recruitment and retention of staff, whilst there will also be a focus on:
- New models of care and integration
 - Maximising the economic value of social care
 - The importance of training and development (grow your own)
 - The value of social care in addressing some of the challenges faced by the NHS.
16. There has been widespread stakeholder engagement across the region, with WCHC staff taking part in workshops and interviews. The framework once completed will also be accompanied by a proposed implementation plan to scale up a range of recommended initiatives. Completion of the framework is expected in Quarter 2.

Review of the NWADSS Sector Led Improvement (SLI) Programme

17. Having taken part in an Adult Social Care Peer Review during May 2019, WCHC has continued to play an active role in promoting sector led improvement and best practice within Adult Social Care. Now an attendee of the NWADASS Sector Led Improvement (SLI) Board, the Trust recently took part in a review with partners across the region to review the current offer and make recommendations to strengthen the programme.
18. This review resulted in a number of key actions being agreed including the development of an updated memorandum of understanding and Board terms of reference and a refreshed offer to be launched from April 2020.
19. Although already robust, there is a commitment to further strengthen the current SLI offer which will benefit WCHC and its staff. Key areas suggested include:
- The adoption of a more blended approach to the Peer Challenge Programme incorporating both universal requirements and the option for targeted requests.
 - Improved links between the Board, sub regional groups and focused work streams
 - The continued adoption of evidenced based reviewing utilising existing frameworks such as NICE guidance
 - Further development on data collection and reporting

- A continued programme of learning based support including master classes
- The Trust will continue to support the on-going development and implementation of this programme.

A&E Delivery Board and Urgent Care Priorities/Winter Plan

20. Following the conclusion of the Urgent care consultation WCHC have been asked to lead the development of the Interim Urgent Treatment Centre on the Arrowe Park site. This became operational on the 16th December 2019 and includes:-
 - A revised staffing model following local consultation
 - The refurbishment of the environment to include additional consulting rooms and a newly created Point of Care testing (POCT) lab. This also included a staff room and a room refurbished to accommodate the unplanned care team, a blend of nurses, social care staff and admin support on the first floor. This was funded from WCHC's capital programme
 - Further plans are to improve the number of patients being streamed by increasing the number of complex conditions i.e. for paediatrics and minor injuries
 - The other development from the Urgent Care Consultation is the re-designation of the Walk in Centres, to Primary Care Hubs. These will be operational from the 1st April 2020. The planning meetings have been led by the WH&CCCG and include the development of a consistent see and treat model
 - The plans for a permanent Urgent Treatment Centre will be developed jointly with WUTH as part of the capital monies allocated to improve the space in the Emergency Department. The timescale for this development is 2022.
21. The weekly calls with NHSI/E take place depending on the system position.
22. These have been supplemented by daily command meetings; 9 am at the hospital, to which WCHC staff attend and 1pm in WCHC. The aim is to understand the pressure across the system and report back on how issues have been resolved. An additional benefit is the relationship building which is crucial to shared understanding and outcomes.
23. Urgent care executive leads continue to meet to provide accountability, assurance and grip and reports to the A&E Delivery Board. Additionally the Chief Operating Officers from WCHC WUTH and CWP, together with the Urgent Care Commissioner, meet weekly to understand blockages, examine what is working well and look at future plans to ensure that performance is maintained and improved.
24. These discussions have been focused on the main issues that regulators are concerned about; eliminating corridor care, reducing Length of Stay and effective streaming away from ED. This is underpinned by a robust system Winter Plan.
25. Work continues with ECIST until the end of March 2020, to identify obstacles to patient flow in areas where services interface with acute and community care, including front door and discharge pathways. In addition ECIST are leading a rapid improvement event to look at the Fast Track process which is scheduled for the beginning of February.
26. ECIST are also planning a "Frailty at the Front Door" event w.c. 24 February 2020.
27. The other area is to significantly reduce the number of "super stranded" patients in the hospital who are deemed medically fit for discharge. WCHC staff is working jointly with colleagues from WUTH on this.
28. NHSI/E have offered support to the system by engaging colleagues from the Improvement team who will be working with WCHC and the wider system underpin a framework of continue quality improvement when reviewing T2A beds and the wider clinical pathway.

29. WCHC is also working with the NHSI/E national team on a community bed review. For us this means a visit from the national team whose purpose is to identify improvement around flow into and from the T2A beds and also to understand if these beds can support the review of the respiratory pathway for which Wirral is an outlier in terms of Right Care.

Current and previous monthly performance January to Dec 2019

4 Hour standard

4 HOUR PERFORMANCE	Jan-19	Feb-19	Mar-19	Apr-19	May-19	Jun-19	Jul-19
National A& E Performance (WUTH A&E & APH WIC)	74.44 %	73.82 %	76.63 %	73.47 %	81.06 %	83.45 %	81.85 %
Community Trust Performance (3 Walk-in-Centres)	99.63 %	99.37 %	99.76 %	99.83 %	99.72 %	99.90 %	99.84 %

4 HOUR PERFORMANCE	Aug-19	Sept -19	Oct -19	Nov-19	Dec -19	Jan -2020	Feb -2020
National A& E Performance (WUTH A&E & APH WIC)	80.42 %	75.60 %	72.68 %	70.70 %	72.06 %		
Community Trust Performance (3 Walk-in-Centres)	99.96 %	99.83 %	99.80 %	99.67 %	99.69 %		

30. Walk in Centre and Minor Injury Unit activity has remained consistently high.

April 2019	May 2019	June 2019	July 2019	August 2019	September 2019	October 2019	Nov 2019	Dec 2019
7,685	8,232	7,995	8,839	9,045	8,404	8,455	7,749	8,575

Admission Avoidance - Right Care, Right Place

31. A number of commissioned community services support avoidance of admission to acute hospital care; Community Nursing and continence, Community Rapid response / Home First, Tele-triage and Acute visiting service (to be renamed Acute Care and Treatment (ACAT).

32. The total number of admissions avoided in April - December 2019 is shown in the table below compared to 2018/19 monthly average.

Description	18/19 Avg	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	YTD Avg	RAG >= 18/19
Community Nursing Admissions Avoided	342	584	493	513	460	514	322	290	369	461	445	Green
Integrated Continence Admissions Avoided	11	13	9	5	8	7	13	9	11	10	9	Green
Community Rapid Response Admissions Avoided	94	105	91	76	128	93	120	103	100	134	106	Green
Teletriage Admissions Avoided	240	279	265	257	250	227	257	270	281	330	268	Green
Acute Visiting Scheme Admissions Avoided OoH	211	263	235	223	221	229	201	262	229	302	241	Green
Total Number of Admissions Avoided	897	1,244	1,093	1,074	1,067	1,070	913	934	990	1,237	1,069	Green

33. There are a number of pathways contributing to Admission avoidance; Community services supporting alternative pathways to acute hospital admission, Single point of access, Unplanned care team and A/E streaming to Walk in Centres.

Description	18/19 Avg	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	YTD Avg	RAG >= 18/19
Volume of SPA contacts	1,668	1,732	1,787	1,613	1,689	1,534	1,539	1,687	1,620	1,634	1,648	
Proportion of all contacts through SPA NOT referred to Acute (A&E or Assessment)	26%	30%	27%	24%	23%	21%	19%	18%	17%	21%	22%	Green
Total Patients Streamed - Walk In Centres & GP OoH	409	537	593	667	660	634	534	587	696	758	630	Green

Initiatives and service developments to support to avoiding admissions

34. **The Early Intervention Assistants (EIA)** role commenced in October 2019. They are currently undertaking a clinical shadowing role to greater understand roles and responsibilities in ICCT's.

35. An outline of the role of the EIAs was presented at an ICCT neighbourhood submit in January 2020

36. **High Intensity users (HIU)** - Work continues to support the reduction in HIU. This is achieved through the SDIP framework, and monitored through Wirral contract meetings.
37. During Q2, 675 patients considered frail HIU and un-well adult HIU received multidisciplinary targeted support to prevent re attendance and readmission to hospital.
38. Wirral's 0-19 service now provides a follow up service in the community for all children who attend ED. The aim is to prevent re attendance and readmission to hospital.
39. Four drop in children's and young people's clinics are available across Wirral. They provide advice and support regarding mental health and wellbeing, minor ailments, feeding issues and general health promotion.

Integrated System support

40. WCHC continues to attend daily command meetings at WUTH. WCHC also chair an internal command meeting daily. This is to ensure flow of information and subsequent actions are addressed in a timely manner.
41. WCHC have undertaken extensive analysis regarding T2A (Transfer to Access) LOS (Long length of stay). The introduction of the live tracker has identified areas of focus for those providers and commissioners who are in a position to influence T2A LOS. T2A status is shared daily at command meetings.
42. WCHC is working closely with NHSE/I Quality Improvement team to reduce T2A LOS. The review will include 'time away from home'. A patient's journey from admission to hospital to discharge from a T2A bed.
43. WCHC and WUTH continue work in partnership to implement changes in IDT (Integrated Discharge Team) following an appreciative enquiry by ECIST. The IDT system lead and senior manager have supported the team to achieve a significant number of safe complex discharges a week.
44. The interim UTC (Urgent Treatment Centre) has been in place since the 16th December 2019. Point of care testing is currently being implemented.
45. WCHC continue to stream from ED. WCHC and WUTH are working in partnership to scope requirements to move from simple streaming to complex streaming for minor injuries.
46. WCHC supports a recommendation by ECIST to implement an integrated frailty team at the 'front door'. This is currently being explored further.

Collaborative working regarding Children's services

47. WCHC were awarded the 0-19 contract in September 2019. The neighbourhood model is currently being developed in readiness for go live on 1 February 2020. The service has met with Local Authority and Maternity services in Q4 and is planning co location and integrated working within neighbourhoods. This will be rolled out in Q1.
48. WCHC's Looked after Children's (LAC) nurses continue to be co-located in the Local Authority (LA) LAC team. Processes for information sharing have improved as a direct result of co-location. For example the rate of Strengths and Difficulties Questionnaire (SDQ) scores being shared by LA has moved from 4 per month to an average of 21 per month and in further improvements were made in Q3. The service has focused on the voice of the child and an audit in Q2 will be repeated in Q4. This will allow for resources to be embedded capturing the child's voice, particularly for non-verbal children.
49. New practice is being implemented in Q4 prompted by a Serious Case Review recommendation. This involves identification of a Lead health professional for children with complex needs who have multiple health professional involved. The process is a partnership

system across WCHC, WUTH and CWP that will improve communication between professionals for this vulnerable group.

50. A discharge pathway from the children's ward (WUTH) to the Teen team (WCHC) has been implemented and information is shared with the Teen Team about children and young people at risk on a daily basis. During Q3 staff report that they are able to make improved decisions at the point of allocation or when escalating to safeguarding because this information is available.
51. During Q4 the service will improve pathways with WUTH to follow up attendances in A&E to support system wide work in reduction of attendances. This is a direct result from information shared at the Command meetings.
52. During Q3 the INVOLVE group have met and identified important issues where promoting positive health messages can reduce risk taking behaviour and help young people to keep each other safe. During Q4 the service will create videos led by the INVOLVE group. This will be supported by a volunteer with a media background who will help to develop the video.
53. School nursing visibility continues to improve in schools. The service is promoting its service offer through social media platforms. Opportunities for increased visibility in school are being scoped out as part of the mobilisation of the new service. Changes within the new model are being communicated to partners.
54. During Q3 workshops were planned for children's therapy teams in WCHC and WUTH to identify opportunities to work collaboratively. The first workshop took place on 15 January 2020 and short and medium term plans have been identified. This involves sharing of IT resources, joint training, improving communication and pathway development. It is aimed that this work will ultimately support business continuity. Rotational opportunities continue to be explored.

Acute Home Visiting scheme (AVS)

55. This scheme is being re-launched on the 3rd February 2020 for two main reasons:-

- From the 3rd February paramedics will have a direct line to the UTC with a dedicated call handler that will monitor the call back times to ensure that we meet the 15 minute target. This will remove any hidden delays that may have resulted from the paramedics going through SPA to receive a call back from the GP.
- Over the past 12 months there has been a gradual migration of work from North West Ambulance Service (NWAS) to GPOOHs. On investigation NWAS have stated that they are at full capacity for what they were commissioned to provide in the 111 contract. They are directing a number of calls that should be managed by 111 clinicians back to local providers. These numbers will be monitored and reflected in the admission avoidance dashboard. The service is working with commissioners explaining and evidencing the rise in demand and working on appropriate solutions.

56. As a consequence of this the term AVS does not reflect the totality of the work being undertaken so the scheme is being rebranded as Urgent Care Treatment and Advice (UCAT). This will be reflected as the descriptor in the BCF funding stream.

Integrated Therapy's work

57. The Moving with Dignity project is progressing well with partnership working in place between WCHC, commissioners and private domiciliary care providers. The principles of moving with dignity are now being used by WCHC staff in their assessments. Many of the smaller domiciliary care providers are now showing an interest in being involved in the scheme, whilst engagement with agencies is continuing. We are awaiting changes to liquid logic to support full roll out.

58. A first review of the pathways between unplanned care and neighbourhood therapy services (OT and Physiotherapy) has taken place to learn from cases transferred to further improve flow to enhance and support community rehabilitation and re-ablement, admission prevention and supported/timely discharge from hospital.
59. Meetings are scheduled with colleagues in WUTH to consider how the WUTH/WCHC services can integrate and also support the hospital work on therapy led discharges.

WCHC Heart Failure Transformation Project Update

60. The team continues to identify many new ways of working that enhance the care pathway that were not detailed in the original scope of the project. This includes team productivity which continues to grow and this is being evaluated as part of the project and the development of the business case.
61. Heart Failure (HF) hot slots can be accessed by both GPs and Secondary care via a Cerner Millennium referral bundle. A new pathway has been clarified on SystmOne which will record the entire hot slot activity.
62. The ISTAT point of care testing to test kidney function is in place. The service is able to safely and effectively change medications/dosages to reduce symptoms and prevent decompensating potentially leading to hospital admission. This test can be done in both the clinical and home setting. Due to its success and a successful charity fund application another machine is on order.
63. The service through an estates redesign funded via capital has an ambulatory IV room ready to accept patient's for IV diuretics and potentially IV Iron to manage symptoms of heart failure and improve quality of life. This clinical space is now ready to use.
64. The HF team continues to develop strong links with the community palliative care team. Two Palliative care specialist nurses attend monthly team meetings. This partnership allows the HF team to access the support services of the hospice and support roles, including social workers, occupational therapists and dieticians to improve quality of end of life care.
65. Links continue to grow with the Tele-triage team, handing over Care home patients on a Friday afternoon with a detailed management plan to prevent inappropriate hospital admissions.
66. This month engagement opportunities with Primary Care have included the Practice Nurse NMP forum and GP Prescriber Cluster Group meetings; so far the feedback has been excellent. More engagement is planned.
67. The HF message line, in which patients or professions can leave message and are contacted on the same day is working well. The result of this innovation is that patients care can be escalated and a HF nurse can respond with an urgent home visit, advice to GPs or support and assurance to patients and their families. Ultimately reducing the risk on unplanned hospital admissions.
68. Through twice weekly medications optimisation clinics and the HF nurses identifying current patients who are clinically appropriate for Sacubital/Valsartan the compliance rate on the Wirral is now at 62%. This has exceeded the minimum national target set by NICE.
69. The Cardio Vascular Disease (CVD) Rehab team was successful in becoming one of four Beacon sites across the UK to pilot ReachHF (research study) led by Exeter University. This is a home based rehab program specifically for HF patients who would find it difficult to attend traditional group based classes. 25 patients have received this program so far with another 25 over the next 6 months. Feedback from patients and staff has been excellent, with a patient testimonial planned. The pilot lead visited the service on the 28th January 2020 and was very impressed with the team's commitment to change and providing a range of rehab options to

suit the needs of the patient. The service lead and staff interviews undertaken will inform the re outcomes of the study which will be published in 2021.

70. The Cardiovascular rehabilitation program achieved national certification (BACPR) for the 3rd year and continues to ensure Heart Failure patients have equal access to rehabilitation. The national average uptake is only 5%, whereas on the Wirral it is over 50%. This has been achieved due to the Wirral being an early adopter of HF Rehab (2006), which has been developed to fully integrate Heart Failure patient's needs into all aspects of the service.
71. Within the Healthy Wirral CVD plan, a redesign of Cardiovascular and integration with Pulmonary Rehabilitation (WUTH) is in process. The aim is to provide flexible and effective rehabilitation to patients with multiple long term conditions, pooling resources and clinical skills to improve patient outcomes. Patient Activation Measures (PAM) will be used to individualise care and ensure resources are used efficiently and effectively. There has been national interest in the new 'Wirral Pathways to Health' – Choosing the right rehab for you model.
72. Tele-health is planned for the next 12 months, utilising technology to monitor specific parameters as an early warning system, i.e. weight, heart rate, blood pressure and patient reported measures to escalate care and prevent de-compensation and potentially death. This includes employing a digital health nurse, which will complement the existing team.
73. WCHC is involved with the Cheshire and Mersey HCP Heart Failure pathway design, which will be published next year. The Wirral is seen as a leader in innovation and employing a whole systems approach to improve heart failure care, clinical outcomes and most importantly quality of life. The final draft is in development and will be published in the coming months.
74. The next stage is to start to evaluate the project and develop a comprehensive and sustainable business case to be presented to the CCG. This started in January 2020 with support from business intelligence teams from WCHC WHCCCG, review of patient experience including specific feedback forms and patient stories.
75. Initial analysis of hospital admission and Length of Stay (LOS); including excess bed days which incur a higher cost to the system have shown a positive impact on system resources. See table below. This data will support the business case for continued funding.
76. Mortality data has also been favourable (see table below), however this needs further analysis to determine the effect on differing demographics within the Wirral health population.

		Admissions/ Activity	Cost	Excess Bed days	Cost	Total Activity	Total Cost
17/18	Non Elective Total	511	£1,982,402	177	£42,085	688	£2,024,487
18/19	Non Elective Total (New HRG Tarrif)	536	£2,089,697	125	£29,521	661	£2,119,218
19/20	Non Elective 6 months Totals	238	£987,478	30	£8,062	268	£995,539
19/20	Non Elective Projected	476	£1,974,956	60	£16,123	536	£1,991,079
	Potential reduction in activity /system savings	60	£114,741	65	£13,398	125	£128,139

HF Mortality per 1000 of population	2018	2019	Reduction in year	% Reduction in Mortality
National Average	24.03	22.64	1.39	5.70%
Wirral CCG	26.32	17.5	8.82	34%
Liverpool CCG	35.09	25.86	9.23	26.30%
West Cheshire CCG	35.09	25.97	9.12	25.90%

Conclusion

77. The Trust continues to be an important and valuable partner within the local health and social care economy, and wider with the development of STP's across the Cheshire and Merseyside footprint.
78. This month's report evidences the progress that has been made across a number of projects which are related to integration, partnership and collaborative working across many layers within the health and care system. It is complex and multi-faceted.
79. Integration is the cornerstone of our care model and the Trust is ideally placed to lead. Our staff are integral in delivering the different care models and the staff supporting the development of the Neighbourhood model are well placed to drive the development because of their skills and expert knowledge.
80. We are the key partner in providing or navigating to alternatives out of hospital. We have to communicate and demonstrate what our strengths are in delivering services, both nationally and locally, in partnership for the future. The added value that the WCHC contributes is a holistic view of patients and their trust in us, multidisciplinary team working, knowledge of our communities, strong leadership for consensus and partnership and a willingness to embrace new relationships and collaborative working.

Board action

81. The Board of Directors is asked to be assured that the WCHC is instrumental in Healthy Wirral and wider. We are absolutely the "place" in Place Based care especially in the space of integration, urgent care and influencing commissioning and primary care agenda's which ensures the delivery of a high quality service which enhances patient care and patient experience.

HEALTHY WIRRAL PARTNERS BOARD, 31 OCTOBER 2019 - BRIEFING NOTE

1. Purpose

The *Healthy Wirral* Partners Board met on 31 October 2019. This briefing note summarises the key issues discussed at this meeting. It is expected that this briefing note and the papers from the meeting will be shared with the respective governing bodies of the constituent organisations who are working in partnership within the *Healthy Wirral* change programme.

2. Transformation Fund

Following a meeting of the Transformation Fund Panel on 18 October, a short paper was presented to the board with regard to issues around the short and medium term funding of a number of programme support posts. The board agreed the following actions:

- The Healthy Wirral Programme team to establish a more detailed case for change for the future deployment and oversight of the transformation resources from 2020 and present to the November Board.
- In the meantime, to ensure programme continuity the existing programme support to be extended until March 2020.

3. Chair's Report

The Healthy Wirral Independent Chair asked all board members to renew their commitment to working as one system and to address any system culture and behaviours that might be barriers to collaborative working. The board discussed how they could achieve greater system transparency and oversight on issues that are likely to impact on system performance and sustainability.

4. Delivery

4.1. Work Stream Updates

The Partners Board received updates from four Healthy Wirral work streams:

- **People Programme**

The original deliverables for this program were based on meeting the requirements linked to the funding received from the Local Workforce Action Board (LWAB). Regionally it has been recognised that systems need to consider a very different way of workforce planning in the future, which includes the independent sector and primary care and aligns better to wider system planning.

The programme has now identified five strategic priorities. Task and Finish groups have been set up involving a wide range of partner organisations across Healthy

Wirral to work on these. The programme is looking to hold a workshop in January to bring together:

- The programme priorities from the task and finish groups
- Requirements and priorities emerging from other Healthy Wirral programme areas
- Recommendations from the Healthy Wirral Partners Board based on their assessment of the Healthy Wirral 5-year strategy.

There are 2 main risks for the programme:

1. Capacity of Wirral partners to support the work required of the task and finish groups.
2. Funding continuation for the core People Programme Team. The mitigation is that a further bid for funding has been submitted to Cheshire and Merseyside LWAB which is due to be discussed in November.

• **Children & Families**

A significant focus of the work had been around building an integrated system approach for developing children's and families and it is good to report that we now have a children and families strategic commissioning board which will improve integration of planning and prevent commissioning in isolation.

Other key activities in this period have been:

- The successful re-commissioning of core elements the 0-19 health child programme to Wirral Community Health and Care NHS Trust.
- Responding to the cessation of the community 1:1 midwifery services from 31st July 2019. This service will not be re-procured and a decision was made last week by all CCGs that this would done via all local contracts. However, NHSE has said it would be "unforgivable" if those services did not achieve the requirements of better births in the delivery of those services.
- Work is underway to look at mental health support in schools. 43 Primary schools have been identified so that low level mental health is dealt with in the school system.
- Flu vaccinations for children are progressing very well and special schools are being targeted.
- Far too many young people with learning disabilities and autism in Wirral are going into inappropriate placements. It is an urgent priority for Wirral to address the key priorities to address this issue. There are plans in place to improve admission avoidance.

• **Population Health and Digital**

A brief update was given to the board to establish a clear way forward for population health and the role of the Wirral Care Record, following its launch in September. It was agreed that a business case paper will be presented to the board in November that will focus on:

- Infrastructure
- Intelligence
- Interventions

The business case will cover how the Wirral Care Record supports the delivery of population health management locally and how it should support the development of our strategies: particularly around the place based integrated care work to deliver the Healthy Wirral Strategy and establishing a sustainable infrastructure to support the strategy for population health.

Following the departure of key members of the current programme team for the Wirral Care record, the board agreed to support the sourcing and appointment of a 'caretaker' manager to ensure the work to date is embedded and continuity is maintained whilst the future programme position is established.

- **Neighbourhood Programme**

The board considered a briefing note outlining the programme refresh for the Senior Change Team with the aim of addressing transformation and pace. The neighbourhood programme will need active participation and empowered representation from all partner organisations. Work plans would consolidate into 2 areas. Karen Howell will chair the programme board for this work. She and James Barclay will bring a detailed paper to the November meeting indicating how the programme would be re-focused. The programme will align to financial and productivity outcomes. The board were asked to confirm membership as soon as possible to James Barclay [page 2 of the papers (page 59 of the agenda pack)].

5. Performance and Planning

5.1. Month 6, 2019/20

5.1.1. *Income and Expenditure to date*

The financial position at Month 6, 2019/20 was shared with the Partners Board. The system is reporting an adverse variance of £9.9m at Q2 against the control total plan and includes the unidentified QIPP plan of £17.9m. The variance remains the same as it was in August as WCCG have brought forward further contingency to reduce the deficit at September on the basis that support to WUTH will be repaid in the final quarter of the year, this however understates the adverse variance for the system as at Q2. WUTH's position has deteriorated again by a further £700k since August and it is to be noted that the CCG support to WUTH of £4,050k at Q2 to secure central monies is on top of the £4,500k in the contract baseline (£2,250 to Q2).

5.1.2. Savings Plan to date

The savings plan position shows an adverse variance against the savings plan of £9.4m which is predominantly the CGG unidentified QIPP which was highlighted within the planned submission and factored into the overall risk adjusted plan for both the CCG and the system.

5.1.3. Cost Improvement Plans (CIP)/QIPP In-Year Risk

There is significant unidentified risk for the Wirral system as a whole of £18.6m, which currently resides within the WCCG's position. This level of risk was highlighted within the planned submission against the control totals set for the system. Against the risk adjusted plan however there is a risk of £2.2m of non-delivery across the system. The recurrent risk for the savings plan clearly demonstrates the level of non-recurrent savings in year as the recurrent risk is £3.2m greater. This will have an adverse impact on 2020/21 and has been factored into the long term recovery plan for the system.

5.1.4. Forecast Income and Expenditure

The Forecast deficit presented to the regulators in September remained at £13.6m; this was not accepted and the system was asked to improve on this position. Unfortunately there has been further deterioration in the forecast during October and the likely scenario is now a forecast deficit of £25.7m.

The latest forecast shows an increase in the cost pressures at WUTH by a further £1.45m and additional winter pressures of £0.5m, WCCG increased pressures of £2m for prescribing and continuing health care and there has also been a reduction in the level of system mitigations expected of £3.7m all resulting in a total pressure of £7.6m from last month. Consequently we will not have sufficient mitigations to support WUTH in achieving their breakeven control total and we will therefore lose central funding in Q4 of £4.4m which will increase the deficit to the £25.7m.

It is to be noted that the non-recurrent support in year which is expected to be £6.8m within the current forecast (aside from the contractual support of £4.5m at the beginning of the year) from WCCG to WUTH to support their position has resulted in the Trust securing the PSF & FRF monies for the first three quarters, otherwise the forecast deficit would have been £8m worse.

5.2. Financial Recovery Plan and System Assurance Meeting

The plan which has been updated with quarter 2 performance and the latest mitigations was presented to the board.

Whilst the system will have to submit what we have at this stage there is a substantial amount of work to complete in preparation for the next review meeting

with regulators. An action plan has been sent out to partners complete with named key responsible officers. Simon Banks will be collating this information and evidence on the morning of 12 November, and a meeting will also be arranged with CFOs, CE's, and all nominated representatives prior to the next system assurance meeting.

System partners have been invited to a meeting on 8 November with regulators and Ernst & Young to discuss how they can help support the system. It cannot be emphasized too strongly that the situation for the system is very serious and we are not achieving the required traction on a number of areas of concern.

It was agreed that "Delivery" section of the November board agenda would be removed and managed within the Healthy Wirral Programme Management Group, with the exception of any key issues for escalation to allow the board to focus on strategic issues particularly around Financial Recovery.

5.3. Final Endorsement of the *Healthy Wirral* 5 Year Strategy

The final draft of the *Healthy Wirral* 5 Year Strategy was shared with the Partners Board. The latest version had been circulated to all system leads prior to the meeting. It was intended that the strategy would be presented for endorsement by the Health and Wellbeing Board in November, however due to pre-election requirements this will now be delayed until after 12 December.

6. Governance

6.1 Update on developing a *Healthy Wirral* Integrated Care Partnership

Graham Hodgkinson advised the board that he and Paul Edwards are working on the key concepts and these will be discussed with partners over the coming weeks. The board were also informed that the Wirral Integrated Provider Partnership would address this topic at their next meeting.

7. Risk Appetite and Assurance Framework

Paul Edwards informed the group that he is currently working on identifying risk owners and will provide an update at the next meeting.

8. Carter at Scale: Pathology

Andrew Bamber from the Cheshire and Merseyside Health and Care Partnership (HCP) pathology programme provided the group with a presentation on the overview, about where the HCP programme work is up to, and how this related to the *Healthy Wirral* Programme:

- What they have achieved to date;
- What they need help with, and
- What the challenges are.

9. Productivity and Health

Allan Higgins - Programme Director, Public Health England apprised the board in the work around Health Productivity and Inclusive Economies in Liverpool City Region. This focused on the relationship between work/ productivity, wellbeing and health. The board were informed that there will be a workshop on 3 December in the Mansion House, Calderstones Park to bring this work together.

This work is fundamental to population health within the Wirral strategy and needs to be a clear future focus for our system. It is vital that the Healthy Wirral Plan links in with the wider Wirral and LCR plans.

Integrated Performance Report - December 2019

Meeting	Board of Directors		
Date	05/02/2020	Agenda item	11
Lead Director	Karen Howell, Chief Executive		
Author(s)	Executive Leadership Team		
Action required (please tick the appropriate box)			
To Approve <input type="checkbox"/>	To Discuss <input type="checkbox"/>	To Assure <input checked="" type="checkbox"/>	
Purpose			
<p>The purpose of this report is to provide assurance to the Board of Directors on the year to date performance of the Trust across quality, workforce, (contractual) performance and financial domains against specific indicators, targets and goals.</p> <p>The report is available as a dashboard through TIG and will be presented live in the meeting.</p>			
Executive Summary			
<p>The Integrated Performance Report has been developed as a dashboard in the Trust's Information Gateway (TIG). The dashboard reflects performance against quality, workforce, (contractual) performance and financial domains as overseen by the monthly Oversight & Management Board, chaired by the Chief Executive and reported to the relevant sub-committee of the Board.</p> <p>This report should therefore be considered in conjunction with the reports from the Chairs of the relevant sub-committees where areas of performance are reported, tested and challenged. Any areas of significant risk are reported to the Board of Directors through the sub-committees.</p> <p>The YTD position up to and including December 2019, reports strong performance across all domains and was reported to the Oversight & Management Board meeting in January 2020 and is available through individual performance dashboards on TIG.</p> <p>In summary;</p> <ul style="list-style-type: none"> - All quality goals are reporting as green (RAG rating) - There were zero missed medication incidents - There was one IG incident reported to the ICO which has now been closed - Friends and Family Test scores remain high with 98% recommending the Trust - 94% of contractual KPIs are reporting as green or amber - Cost Improvement Programmes (CIP) targets are reporting ahead of plan for the year-end - Financial performance remains on target with the Trust reporting a surplus position - The Trust's Use of Resources rating remains Level 1 - Mandatory training compliance remains high across all clinical and non-clinical services at 95.1% - Sickness absence has marginally increased to 5.9% but is reporting comparatively lower than 2018-19 - Agency spend has improved to 25.04% against the 25% agency cap <p>It is worthy of note that a joint contract meeting with the CCG and Local Authority, the strong performance of the Trust was recognised.</p>			

Risks and opportunities: Any risks associated with performance across domains are reported through the governance structure and escalated in accordance with the Trust's Risk Policy. Any high-level risks (15+) are escalated to the sub-committees and to the Board of Directors if required. The IPR provides an opportunity to view a visual summary of performance across the Trust, providing the Board of Directors with assurance on quality, workforce, (contractual) performance and financial performance.		
Quality/inclusion considerations: Quality Impact Assessment completed and attached <input type="checkbox"/> No Equality Impact Assessment completed and attached <input type="checkbox"/> No Individual EI and QI assessments are completed for specific programmes of work. The IPR is a high-level summary report against specific indicators, goals and targets.		
Financial/resource implications: Any financial or resource implications in respect of performance are reported through the governance structure to the Oversight & Management Board and the relevant sub-committee. Any potential negative implications are raised as risks and reported through the risk escalation processes.		
Trust Strategic Objectives Please select the top three Trust Strategic Objectives that this report relates to, from the drop down boxes below.		
<input type="checkbox"/> Our Populations - outstanding, safe care every time	<input type="checkbox"/> Our People - enhancing staff development	<input type="checkbox"/> Our Performance - delivering against contracts and financial requirements
Board of Directors is asked to consider the following action The Board of Directors is asked to receive the IPR for assurance noting the performance reported through the Oversight & Management Board and the sub-committees of the Board. The Board of Directors is asked to consider this report in conjunction with the reports from the Chairs of the sub-committees.		
Report history		
Submitted to	Date	Brief summary of outcome
Board of Directors	06/11/2019	Regular report to the Board of Directors.

Board Assurance Framework (BAF) 2019-20			
Meeting	Board of Directors		
Date	05/02/2020	Agenda item	12
Lead Director	Alison Hughes, Director of Corporate Affairs		
Author(s)	Karen Lees Head of Corporate Governance		
Action required (please tick the appropriate box)			
To Approve <input checked="" type="checkbox"/>		To Discuss <input checked="" type="checkbox"/>	To Assure <input type="checkbox"/>
Purpose			
The purpose of this paper is to share with the Board of Directors the updated Board Assurance Framework (BAF) for 2019-20, for review and approval.			
Executive Summary			
<p>The principal risks in the BAF were developed by members of the Board through informal and formal board sessions and Executive Leadership Team discussions.</p> <p>The principal risks for 2019-20 cover the three strategic themes of Our Population, Our People and Our Performance which underpin the Trust's organisational strategy.</p>			
Risks and opportunities:			
<p>The highest risk remains at 20 for ID11 Six risks are rated 12, ID02, ID03, ID04, ID05, ID07, ID08, ID12</p> <p>The risk rating for four risks have been reduced:</p> <p>ID01 from a risk of 12 (4x3) to a proposed risk of 8 (4X2) ID09 from a risk of 8 (4X2) to a risk of 4 (4X1) this is a further reduction, following the reduction in November 2019 ID10 from a risk of 8 (4x2) to a risk of 4 (4X1) this is a further reduction, following the reduction in November 2019</p> <p>No risk ratings have been increased</p>			
Quality/inclusion considerations:			
<p>Quality Impact Assessment completed and attached <input type="checkbox"/> No</p> <p>Equality Impact Assessment completed and attached <input type="checkbox"/> No</p> <p>The quality impact assessments and equality impact assessments are undertaken on the work streams that underpin the BAF</p>			
Financial/resource implications:			
The financial and resources implications are detailed in the BAF for each risk			
Trust Strategic Objectives			
Please select the top three Trust Strategic Objectives that this report relates to, from the drop down boxes below.			
Our Populations - outstanding, safe care every time	Our People - enhancing staff development	Our Performance - increase efficiency of all services	

Board of Directors is asked to consider the following action		
<p>The Board of Directors is invited to provide any comment on the updated BAF.</p> <p>The Board of Directors is asked to review and discuss the principal risks and approve the updated BAF for January 2020.]</p>		
Report history		
Submitted to	Date	Brief summary of outcome
The Board Assurance Framework is reported to every meeting of the Board of Directors for discussion and assurance.	06/11/2019	The revised BAF was reviewed and approved with the reduction in the risk rating for two risks ID09 and ID10

Board Assurance Framework (BAF) 2019-20

Developing the Board Assurance Framework Review - October 2019

1. The development of the BAF included the identification and agreement of the principal risks based on a consideration of the BAF for 2018-19 and the progress of those principal risks, and the Healthy Wirral Assurance Framework providing an oversight of identified system-risks.
2. There are 12 principal risks which are being monitored through the Board Assurance Framework for 2019-20.
3. The Executive Lead(s) and the group for oversight has been identified for each principal risk.
4. There is a summary page detailing the top 3 risks, a summary page with all of the risks including current and target risk ratings and a heat map to track the movement of risks during each quarter. Each principal risk is presented using a consistent format and covers the risk rating, the risk appetite, the key consequences together with controls and assurances and any identified gaps. Where gaps have been identified actions to address are included.

The Board Assurance Framework Review - January 2020

5. All changes are highlighted in **red** text in the BAF tables. The full refreshed BAF for January 2020 is attached at **appendix 1**.
6. The risk ratings and risk appetites have been reviewed with three changes to a current risk rating as detailed below. A number of additional controls and mitigations have also been added to the management of the principal risks, together with further assurances.
7. **ID01 - Non-compliance of our services with statutory, regulatory and professional standards** it is proposed the risk rating is reduced from the previous risk rating of 12 (4X3) to 8 (4X2) given the substantial assurance awarded following a MIAA review of the SAFE governance system, and Quality lead roles recruited with a key objective to sustain and continue developing the SAFE system of assurance.
8. **ID09 - Failure to deliver the efficiency programme resulting in a reduction in service delivery and options for people** has been reduced from the previous risk rating of 8 (4X2) to 4 (4X1) as the Trust is reporting a position ahead of plan for the CIP performance for 2019-20.
9. **ID10 - Failure to achieve all the relevant financial statutory duties resulting in less freedom to operate and increased regulation** has been reduced from the previous risk rating of 8 (4x2) to a risk rating of 4 (4X1) following the agreement of non-recurrent actions with regulators and health economy partners that lead to a forecast with high confidence that the control total will be significantly exceeded, and the Financial Use of Resources score maintained at level 1 for second consecutive month as at month 9.
10. One further gap in controls have been included since the last refresh of the BAF, together with planned actions to close these gaps for risk ID04.
11. There have been no changes to target risk ratings.

Board of Directors action

12. The Board of Directors is invited to provide any comment on the updated BAF.

**Wirral Community
Health and Care**
NHS Foundation Trust

13. The Board of Directors is asked to review the principal risks and approve the updated BAF for February 2020

Initial	4	3	12
Current (January 2020)	4	3	12
Target	4	1	4

Risk Appetite	Averse
---------------	--------

Key Consequence

Key consequences of non-compliance of services with statutory, regulatory and professional standards include:

- Significant harm to patient/service user
- Loss of public confidence in the service
- Poor experience and retention of staff
- Requires improvement or inadequate CQC rating and associated reputational damage
- Claims and complaints
- Regulatory notices and contractual consequences

Key Controls or Mitigations <i>(What are we currently doing to control the risks?)</i>	Date/Frequency
• MUST DO and SHOULD DO action plans in place to address following CQC inspection report completed	31.07.2018
• Monitoring and assurance plan in place to track progress against MUST DO and SHOULD DO actions	Plans updated on a monthly basis and reported to SAFE and QSC
• Regular engagement meetings established with CQC lead inspector and relationships manager	Bi-monthly Quarterly
• CQC compliance officer appointed internally - 9 month secondment – secondment period extended pending CQC inspection	31.03.2020
• Clinical SAFE Programme Manager appointed - 9 month secondment – secondment period extended until professional leadership roles are all recruited to	31.03.2020
• Quality lead roles recruited with a key objective to sustain and continue developing the SAFE system of assurance	
• SAFE system procured to enable self-assessment against CQC standards across the Trust	01.11.2018
• Establishment of SAFE steering group	31.01.2019 – meeting monthly with agreed ToR in place and reporting to QSC
• SAFE Standard Operating Procedure (SOP) approved at SAFE	11.07.2019

• Establishment of Clinical Risk Management Group	Weekly
• Safeguarding Strategic Group	Monthly
• IPC group	Monthly
• Information Governance Group	Monthly
• Professional Standards Group – Adult Social Care	Quarterly
• Themed safeguarding children and CLA CQC review and associated learning	13.05.2019
• Quality & Safety Committee (QSC) ToR and sub-group reporting arrangements updated to include SAFE Steering Group	June 2019 (presented to Board of Directors July 2019)
• Quality governance processes in place including clinical audit, monthly clinical incident and risk analysis, quality improvement programme, quality strategy delivery plan, patient experience intelligence	Annual delivery plans reported bi-monthly to QSC
• Strengthened arrangements for divisional QPER supported by TIG dashboards	Monthly
• Clinical, governance and financial policies and procedures based on best practice in place	Monthly review of clinical policies at Divisional CEG/QAG
• ‘Freedom To Speak Up’ Guardian & Team – self-review tool completed and improvement plan in place	Reviewed monthly by FTSU group
• Shared learning – reflections & learning bulletin, safety soundbites, divisional newsletters	Monthly
• Quality Forum with Council of Governors (inc. Healthwatch representation)	Quarterly
• Weekly ops & quality governance huddle to review hotspots and risks	Weekly
• Inclusion Strategy (including Inclusion Champions, Partnership Forum) approved at Board	03.07.2019
• Commencement of NHSI facilitated ‘Moving to Good’ programme	31.10.2019 – October 2020

Assurances *(What evidence do we have to demonstrate the controls or mitigations are having an impact? How is the effectiveness of the control being assessed?)*

Internal

• Quality & Safety Committee receiving assurance on CQC action plan progress
• Monthly Quality & Patient Experience Report to QSC
• Quarterly Quality Strategy Assurance Report to QSC
• Quarterly complaints & concerns report including a summary of key learning each quarter to QSC
• Quarterly People Strategy Assurance Report to EWC
• Monthly risk reports to all sub-committees
• Monthly Workforce Report to EWC
• Patient Story and Staff Story at Board of Directors
• Clinical Audit Reports to SAFE

• MIAA internal audit programme – quality domain
• Patient Engagement Group ('Your Voice') expanded membership
• Divisional Review Panels undertaken to conduct 'deep dive' on each service level self-assessment
External
• Substantial assurance awarded following a MIAA review of the SAFE governance system
• Enhanced quality monitoring meetings discontinued by CCG (confirmed by letter June 2019)
• Quality Risk Profile (QRP) review meetings with CCG, NHSI & CQC – discontinued 13.06.2019 due to assurance on the quality of services provided and progress against action plans.
• Adult Social Care Peer Review and associated learning
• Friends and Family Test score and national benchmarking
• Annual Quality Report and Annual Report including accounts and audit opinion
• NHSI Single Oversight Framework segmentation – category 1 for use of resources
• CCG serious incident group attendance – good assurance reported
• National Safety thermometer benchmarking
• Representation on QNI Community Nursing executive group
• Representation on Clinical Senate and joint working on clinical leadership across system
• Publication of CQC system-wide Safeguarding Children inspection report

Key Gaps in Control <i>(Where are we failing to put controls or mitigations in place?)</i>	Gaps in Assurance <i>(Where are we failing to gain evidence that our controls/systems are effective?)</i>	Actions Planned <i>(What plans are in place to reduce the gaps in control or provide assurance?)</i>	Date
	CQC re-inspection of core services	<p>Quarterly engagement meeting with the new inspection team (following transfer of community providers to the mental health inspection team) taking place on 1 July 2019</p> <p>Participating in NHSI Moving to Good programme</p> <p>Leadership forum session delivered focussing on action planning and prioritisation, culture and leadership, visibility and preparation</p> <p>Q4 2019/20 CQC action plans developed and tracked</p>	<p>July 2019 Quarterly</p> <p>31 December 2020</p> <p>20 January 2020</p> <p>31 March 2020</p>
Further testing of CQC self-assessments at service and divisional level through SAFE		SAFE focus groups planned at service-level	September 2019 – September 2020

Well led-self-assessment by the Board		Self-assessment beginning in September 2019	December 2019 feedback to Informal Board, and action planning underway. Paper to Public Board including action plan in April 2020
Awaiting introduction to new CQC inspection team following national changes which transfer responsibility for the Trust inspection to the Mental Health inspectorate team		Contact made with CQC requesting urgent resolution to this issue. Current inspector has confirmed that the new inspector has been identified. Request made to agree a handover engagement meeting in September 2019. Engagement meeting planned for 4th November with new inspection team	September 2019
Further strengthen Quality Improvement Infrastructure across organisation		Engage with key stakeholders to review and refresh Quality Strategy and associated Quality improvement Operational Plan	31.03.2020

Key Consequence
<p>Key consequences of citizens health & wellbeing negatively affected by the delivery of sub-optimal quality services include :</p> <ul style="list-style-type: none"> • Significant harm to patient/service user • Loss of public confidence in the service • Lack of coordination of care • Poor patient/service user experience • Claims and complaints

Key Controls or Mitigations <i>(What are we currently doing to control the risks?)</i>	Date/Frequency
• WCT strategy and strategy refresh aligned to NHS Long Term Plan in progress (Feb 2019)	Annual
• Healthy Wirral Programme and associated governance meeting attendance	Monthly
• Annual review of contracts	Annual
• Implementation of key professional/clinical leadership roles across operational services	On-going
• SAFE system procured to enable self-assessment against CQC standards across the Trust	01.11.2018
• Establishment of SAFE steering group	31.01.2019
• SAFE Standard Operating Procedure (SOP) approved at SAFE	11.07.2019
• Quality & Safety Committee (QSC) ToR and sub-group reporting arrangements	June 2019 (presented to Board of Directors July 2019)
• QIA & EIA processes in place	Monthly
• Quality governance processes in place including weekly clinical risk management group , clinical audit, monthly clinical incident and risk analysis, quality improvement programme, quality strategy delivery plan, patient experience intelligence	Monthly reporting to SAFE
• Process in place for reviewing and implementing NICE and other evidence based practice	Monthly reporting to SAFE
• Clinical policies and procedures based on best practice in place	Monthly review of clinical policies at Divisional CEG

• Reflections and learning bulletin	Bi-monthly
• Quarterly Quality Forum with Council of Governors (<i>inc. Healthwatch representation</i>) <i>CQC self-assessment by all clinical services</i>	Quarterly
• Weekly ops & quality governance huddle	Weekly
• Good compliance against mandatory and service specific training (inc. e-learning)	Monthly at OMB
• Completion of leadership programme for senior clinicians and social care equivalent professional managers	September 2018
• Leadership Forum	Quarterly
• Recruitment plan to reduce vacancy rates thus reducing requirements for temporary staff solutions	On-going
• Achievement of KPIs and contract quality indicators	Monthly at OMB
• Strategic focus on population health, early intervention and prevention	Annual review
•	

Assurances (*What evidence do we have to demonstrate the controls or mitigations are having an impact? How is the effectiveness of the control being assessed?*)

• HW MoU signed on behalf of the Trust
• 3-year financial plan, will be supported by lock-in agreed system strategy to enable the planning of the service over the three years, providing stability for the workforce
• Detailed analysis of activity 7/7 and activity of footfall in WIC's and OOH's to enable the adjustment of the provision/staffing levels to meet the anticipated service activity
• Quality & Safety Committee receiving assurance on CQC action plan progress (by exception to QSC from Nov 2018)
• Monthly Quality & Patient Experience Report to QSC including never events exception reporting
• Quarterly Quality Strategy Assurance Report to QSC
• Quarterly complaints & concerns report including a summary of key
• Monthly risk reports to all sub-committees
• Learning from deaths
• Clinical Audit Reports to SAFE
• Leadership Shadowing Programme
• Patient Engagement Group ('Your Voice') expanded membership
• Funding agreed for substantive professional leads for Nursing and Social Care
• WCHC system flow performance group established to monitor performance against key pathways
• System performance dashboard developed to track performance across key pathways
• Pressure ulcer improvement plan developed and monitored at SAFE
External
• Substantial assurance awarded following a MIAA review of the SAFE governance system
• Quality Risk Profile (QRP) review meeting with CCG, NHSI & CQC

• Friends and Family Test score and national benchmarking
• Annual Quality Report
• NHSI Single Oversight Framework segmentation – category 2 1 for use of resources
• CCG serious incident group attendance – good assurance reported
• National Safety thermometer benchmarking
• Healthwatch ‘enter and view’ programme
• Representation on QNI Community Nursing executive group
• Representation on Clinical Senate and joint working on clinical leadership across system
• Positive reputation for delivering 0-19 services
• Good sustained year-end performance against contract
• Attendance at system improvement Board
• Good compliance against contractual quality schedule and CQUIN scheme

Key Gaps in Control <i>(Where are we failing to put controls or mitigations in place?)</i>	Gaps in Assurance <i>(Where are we failing to gain evidence that our controls/systems are effective?)</i>	Actions Planned <i>(What plans are in place to reduce the gaps in control or provide assurance?)</i>	Date
Professional leadership roles across organisation are not consistent	-	Review of professional leadership roles across Trust Standardisation of professional / quality role JDs across all front line professional groups Recruitment of professional / quality leads across all front line professional groups	30/09/19 completed
Funding for additional professional standards/quality lead roles not yet identified.		Business case being prepared for ELT to identify funding for professional / quality lead for therapy trained staff	30/09/19 completed
Safe, sustainable and productive staffing reviews not systematically undertaken and reported		Develop a process for safe staffing reviews to be overseen by the strategic workforce group Task and finish group established to strengthen the current system of governance and assurance relating to safe staffing across all services.	30/09/2019 Completed 31/12/19
Access to validated data to support Commissioner review of BCF funded services		Establishment of WCHC system flow performance group Development of system flow dashboard	30/09/19 completed
	Lack of visibility of clinical/professional audit programme results on SAFE	Develop audit dashboard on SAFE	30/09/19
	Pressure ulcer quality goal rated amber in July 2019 (YTD remains green overall)	Urgent deep dive and dynamic improvement action plan developed to assure patient safety.	30/09/19 completed

Risk ID	Principal Risk	Executive Owner	Date of Last Review	Date of Next Review	Trust Board Oversight
ID03	Services are designed without consideration of current and future service user and potential service user health and social care outcomes and the need to address health inequalities.	Chief Operating Officer	16.01.2020	March 2020	Quality & Safety Committee

	Consequence	Likelihood	Rating
Initial	4	3	12
Current (January 2020)	4	2	8
Target	3	3	9

Risk Appetite	Open
---------------	------

Key Consequence

If the Trust does not respond to the needs of the population then service users, patients and commissioners may lose confidence in the service delivery and either choose to be referred outside of the Wirral (patients/service users) and decommission or tender out services (commissioners).

Reputational damage if for instance the FFT scores reduce.

Potential for staff to leave if they feel that they are unable to provide a service that addresses health inequalities (linked to our values)

Key Controls or Mitigations <i>(What are we currently doing to control the risks?)</i>	Date/Frequency
<ul style="list-style-type: none"> WCHC strategy and strategy refresh describing neighbourhood care and aligning to system- wide strategic intention and NHS Long Term Plan in progress (Feb 2019) 	Board September 2019 - delayed because of the introduction of PCN's and the alignment to the Neighbourhood model.
<ul style="list-style-type: none"> Wirral Partnership Delivery Group involvement 	Monthly

Risk Appetite	Open
---------------	------

Key Consequence
<p>There are three main key consequences of this risk.</p> <ol style="list-style-type: none"> 1. Inability to provide high quality services may lead to adverse or sub-optimal outcomes of the population we serve. 2. There will be a high risk that failure to deliver high quality services will have a negative effect on the reputation of the Trust 3. Inability to provide high quality services may lead to a loss of key workforce to the PCNs when they are funded to employ these individuals (ie. Physiotherapists)

Key Controls or Mitigations <i>(What are we currently doing to control the risks?)</i>	Date/Frequency
Workforce	
• Peoples Strategy and Strategic Workforce Development Group	Quarterly
• Integrated team development supporting flexible workforce - including within primary care (MLMP)	On-going
• Acuity & dependency modelling to support caseload management and workload capacity in community nursing	Used daily
• Alamac benchmarking work	Complete
• Clinical Leadership structure for Community Nursing established	On-going
• Quality Leadership structure established	In progress
• Design of a system target-wide target operating model for out of hospital care	On-going
• Re-alignment of operational and clinical leadership structures at locality level/PCN level	On-going

Strategic	
<ul style="list-style-type: none"> WCHC organisational strategy and its refresh describing PCN alignment and supporting neighbourhood development whilst aligning to system-wide strategic intention and NHS Long Term Plan. 	Annual review Board September 2019 – delayed because of the introduction of PCN's and the alignment to the Neighbourhood model.
<ul style="list-style-type: none"> Service delivery aligned to support PCN development and the flourishing of neighbourhoods community assets 	2019-20
<ul style="list-style-type: none"> MLMP operational model 	In place

<ul style="list-style-type: none"> IT strategy - work in progress to facilitate cross-organisational sharing of data 	
---	--

Assurances <i>(What evidence do we have to demonstrate the controls or mitigations are having an impact? How is the effectiveness of the control being assessed?)</i>
<ul style="list-style-type: none"> Board-level Leadership to implement the community nursing transformation programme
<ul style="list-style-type: none"> Safe, sustainable and productive staffing guidance reviewed and implemented
<ul style="list-style-type: none"> Modelling future of social care providers as part of commissioning intentions and linked to Better Care Fund
<ul style="list-style-type: none"> South Wirral Neighbourhood work can be rolled out to all PCNs

Key Gaps in Control <i>(Where are we failing to put controls or mitigations in place?)</i>	Gaps in Assurance <i>(Where are we failing to gain evidence that our controls/systems are effective?)</i>	Actions Planned <i>(What plans are in place to reduce the gaps in control or provide assurance?)</i>	Date
System capacity & expertise	Effect of the PCNs on Trust's workforce is as yet unknown, but has the potential to destabilise services.	Discussion with PCNs, CCG, WUTH and GP feds to look at system approaches to prevent destabilising. Possible opportunities for the Trust to become a Community services teaching provider - to take through ELT/Board. Role for Strategic Workforce Development Group to progress if this direction is approved.	Q4, 2019-20
Agree model for out of hospital care system-wide	No firm model as yet agreed by the system to deliver integrated services at neighbourhood or locality level	To continue the work done in collaboration with Innovation Agency and Senior Change Team. Assoc. Director of Strategy, alongside the Divisional manager and Medical Director to lead this from the Trust. Target Operating Model being developed across the Health and Care system and led by Assoc. Director of Strategy. Phase one recommendations due by 31/3/20 following system workshop 9 March 2020.	On-going 2019-20
Understanding of the cultural shift required across the system		Meetings to be held with Clinical Directors of PCN and other members of the system. PCN-wide workshops now rolled out to 2 PCNs with others planned (for Feb and Mar 2020) to explore partners needs and wants and relationship building and suggestions for PCN level improvement. Engagement with South Wirral PCN regarding potential shared decision-making model.	On-going Q3/4 , 2019-20
PCN contract and specification has not yet being agree nationally	Uncertainty surrounds the ask of PCNs and system partners to deliver key strands of the NHS Long Term Plan through delivery of the PCN contract	National consultation feedback provided. To await outcome of consultations with BMA/RCGP and NHSE and receive the final specification. At that stage, collaboration can continue to deliver the required outcomes.	
Knowledge of the support required or wanted of each PCN from the Trust	PCNs very early in their development. Clinical Directors now assigned	Meeting to be held with the clinical directors to ascertain this information and build relationships. These commenced in June 2019 and are ongoing. Meeting due February to review Intermediate Care model for community bed base in collaboration with primary and secondary care. Regular attendance by Trust at PCN and LMC meetings.	
Regulatory framework of individual organisations	At present organisations are judged as a single entity which therefore determines their own key priorities, which can differ to that of the system	Work with our regulators to move towards system-wide inspection processes and the Trust is an active contributor to regulator meetings (NHSE/I & CQC)	2019-20

Full understanding of the impact of the Urgent Care Consultation	See ID11.		
Understanding of commissioner direction of travel around outcome based commissioning and system control totals	Outcome based commissioning facilitates services to be centred around individuals receiving that service rather than “tick box” transactional care	Conversations and discussions with commissioners to promote the virtues of this model of commissioning. Tenders are already moving towards this direction in terms of social value content. National agreement that the need to procure local service may not be necessary in the future.	2019-20
Development of risk stratification tool and dashboard		<p>This work is being conducted with commissioners and fragility dashboard has been developed. Discussions now underway as to have the system will owe and operationalise the fragility agenda.</p> <p>Work with Cerner regarding WCR, registries and HealthelIntent beginning following initial scoping meeting with Trust and Cerner.</p>	On-going 2019-20

Risk ID	Principal Risk	Executive Owner	Date of Last Review	Date of Next Review	Trust Board Oversight
ID05	Failure to engage and support staff to deliver the Trust's vision and strategy for outstanding services.	Director of HR & OD	16.01.2020	March 2020	Education & Workforce Committee

	Consequence	Likelihood	Rating
Initial	4	4	16
Current (January 2020)	4	3	12
Target	4	1	4

Risk Appetite	Cautious
---------------	----------

Key Consequence
That staff do not understand the Trust's agreed strategic approach and do not develop their practice or service in a way which echoes that, either from an operational or behavioural perspective. This may result in services which are not consistent in delivering the trust's role in the health and care system and may result in sub-optimal feedback from service users as well as low morale.

Key Controls or Mitigations <i>(What are we currently doing to control the risks?)</i>	Date/Frequency

Initial	4	2	8
Current (January 2020)	4	3	12
Target	4	2	8

Risk Appetite	Open
---------------	------

Key Consequence

Partnerships and collaboration are a key theme of the Long Term Plan and our place in supporting both the local system and the wider STP/ICS is crucial. There are a number of consequences;

- We have to develop and sustain relationships with PCN's in collaboration with CWP as we need to better develop services for people with both physical health and mental health
- Networks and neighbourhoods are key as is our relationship with the acute trust to strengthen admission avoidance opportunities and appropriate safe discharge
- We need to do this to protect the quality of services that are currently delivered to the patients/people of Wirral

Key Controls or Mitigations <i>(What are we currently doing to control the risks?)</i>	Date/Frequency
• Development of relationships with GP Feds, Primary Care Networks, VCF sector, CWP, WUTH, domiciliary care and residential providers via regular meetings and through the governance structure of Health Wirral	On-going
• Representation and involvement in system-wide groups (Healthy Wirral Partnership, Clinical Senate, A&E Board)	Monthly
• Role and leadership function of WIPPB <i>(principles of working agreed)</i>	Bi-monthly
• Exec to Execs with Health and Social Care Commissioners (WHCC)	Quarterly
• Exec to Exec with CWP	Quarterly
• Exec to Exec with Age UK	Summer 2019
• MLMP operational model	In place
• WCHC organisational strategy and its refresh describing PCN alignment and supporting neighbourhood development whilst aligning to system-wide strategic intention and NHS Long Term Plan	Board October 2019, delayed because of the introduction of PCN's and the alignment to the Neighbourhood model. Annual review
• Service delivery aligned to support PCN development and the flourishing of community assets with a neighbourhood	2019-20

<ul style="list-style-type: none"> Partnership with The Innovation Agency to design target operating model for out of hospital care Development of cohort-based system Target Operating Model by AD Partnerships and Strategic Development working in partnerships with WUTH, CWP, general practice, care providers, Age UK, commissioners and others 	On-going
