

Illustrations to Use with Toilet Training

[Illustrations by: Greg Holfeld, Panic Productions, South Australia]

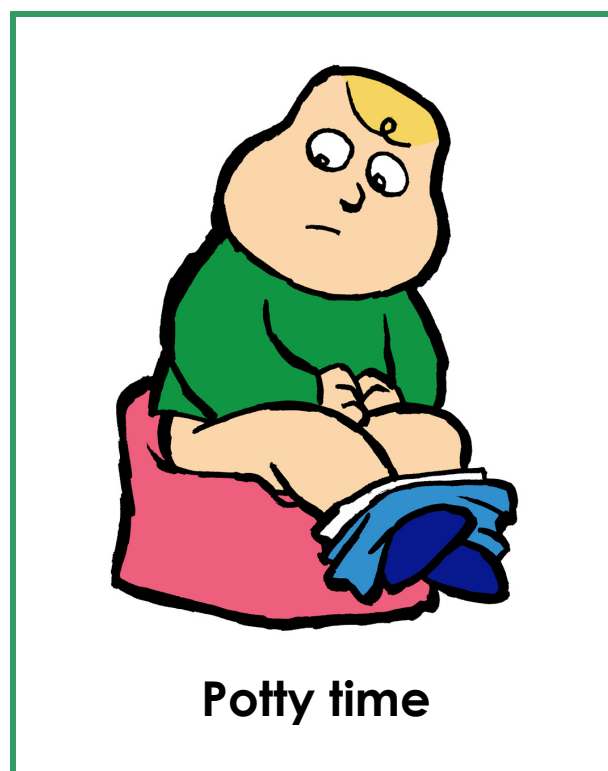

These are examples of colour illustrations that can be used:

- ❖ as single visual cues, or
- ❖ to create a visual sequence to prompt steps in the toileting sequence.

These illustrations may be reproduced as required. To protect the illustration it is recommended that lamination, clear contact, a clear plastic sleeve or a small photo album be used.

A visual cue can also include a realistic object related to toileting, a photograph and/or symbolic pictures. There are a number of different software programs that can be used to create these symbols.

The choice of visual cues will depend on the child's level of language development and it is best to seek advice from a speech pathologist on the most appropriate approach for the child.

Pull pants down

On the toilet

Stand up for a 'wee'

Sit on the toilet

**Wipe bottom with
toilet paper**

Pull up pants

Flush the toilet

Wash hands
