

## **Mortality Report: Learning from Deaths Quarter 2: 01 July 2023 – 30 September 2023**

### **Appendix 1**

#### **Learning from Deaths Q2 23/24 Report**

The following data represents the high-level reporting of deaths which occurred within our services over the period of Quarter 2 2023/24.

A more detailed report has been ratified and approved by the Quality and Safety Committee as per the Learning from Deaths Policy.

There were 13 deaths reported to the Trust and all have been reviewed in accordance with Trust policy. On this occasion, none of the deaths were within scope of this report during this period. This is because the deaths were not associated with any care delivered or harm caused by services provided by the Trust. Duty of Candour was not applicable to any of these cases.

There were ten child deaths reported during this quarter, which followed the appropriate investigation processes and there was no learning specific to the Trust.

We continue to promote shared learning across the health and care sectors and work collaboratively with our system partnership to identify and address the impact of Covid-19 within all the communities in which we provide services, focusing on addressing health inequalities on a population-based approach.
