

Think Chlamydia!

Get tested today.

Chlamydia is the most common bacterial STI among young people.

It often has no symptoms, that's why it's important to get tested!

- Chlamydia is easy to treat but can cause serious health problems if left untreated.
- Testing is quick and simple, just a urine sample or a swab.
- You can get tested for free at ourPlace, your GP or 16+ can order a free postal test kit.

Don't wait, protect yourself and others.

To get tested scan the QR code.
